

Product Feature

AlphaPoint Brokerage Exchange Software

Full-stack platform enabling broker dealers to offer client access to next generation asset classes.

Only AlphaPoint provides the powerful combination of **digital asset exchange technology** with a robust network of additional exchanges to improve liquidity and increase access to capital. AlphaPoint's full-stack platform enables **broker dealers** to offer client access to next generation asset classes.

Key Benefits:

- Offer client access to **cryptocurrency** and other **digital asset classes**
- Secure, scalable, and battle tested
- Gain unprecedented liquidity, with access to network of 100+ exchanges that use AlphaPoint technology
- Sector (or vertical) specific integrations
- Blockchain agnostic and designed explicitly for protocol interoperability

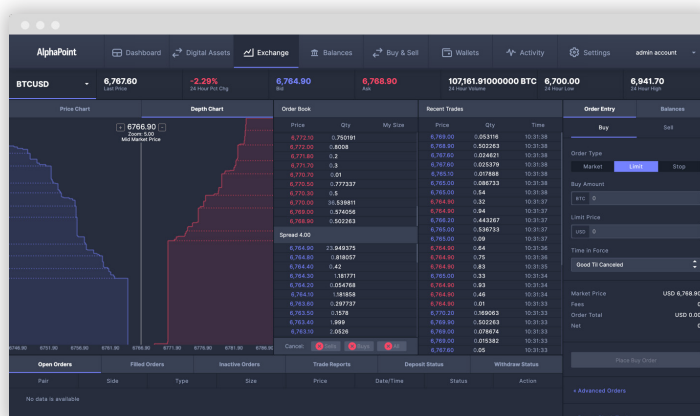

Advanced Features

AlphaPoint provides the brokerage software tech-stack to get you to market swiftly, enabling you to create stand alone marketplaces uniquely structured to meet requirements of regional regulatory landscapes. Our highly configurable API driven technology offers existing brokers a streamlined opportunity to go-live by plugging an existing UI into the API, while new brokers can utilize our full-stack offering as an end-to-end solution.

Operator Controlled Liquidity

Multiple new liquidity sources and market maker connections provide access to competitive pricing and deep books.

Known Trusted Participants

Modifications to AlphaPoint's world-renowned White Label Exchange Software enables limiting order matching to specified internal and market maker accounts, enabling compliance with regulatory requirements.

The screenshot shows the AlphaPoint Users management interface. It includes a sidebar with navigation options like System Metrics, Users, Accounts, Trades, OMS Orders, Products, Instruments, Tickets, and Reports. The main area displays a table of users with columns for ID, Username, Email, Email Verified, Margin Enabled, and Account. The table lists several users, including those with usernames like 'suvg8', 'suvg7', 'suvg6', 'shut3', 'harry-test', 'test993@alphapoint.com', 'test991@alphapoint.com', 'dhyatt@alphapoint.com', 'loyaluser', 'scott_b', and 'mj4'. Each user entry includes a status indicator (X or checkmark) and a corresponding account number.

Second Level Order Book (L2)

While matching is restricted between end users, placing advanced orders is fully available including resting orders such as limit, stop limit, trailing stop limit and attributes such as fill or kill (FOK) and immediate or cancel (IOC)

The screenshot displays the AlphaPoint L2 Order Book interface. It shows a detailed view of the order book with columns for Order Type, Size, Price, Date/Time, Status, and Action. The table lists various orders, including limit orders and stop orders, with their respective sizes and prices. The interface is dark-themed and provides a comprehensive view of the L2 order book.
