

ALPHAPOINT AND ALTY HAVE COLLABORATED TO CREATE THE WORLD'S FIRST **EXCHANGE-BY-CHAT.**

WHAT IS ALTY?

Alty is a blockchain company from Barbados that supercharges communities using a combination of artificial intelligence and live data. Today it's predominantly used for crypto traders who can check live market rates and act on them immediately.

Alty delivers value for businesses and their communities, by automating their engagement over familiar messaging platforms. The real advantage is that users can act on new information without leaving WhatsApp or Telegram. How? Alty has designed and built a fully functioning crypto API that connects all of your exchanges utilities to these chat platforms.

- /Hi:** Brings up the main menu and this command list from anywhere.
- /Login:** Log into your existing account or receive a direct link to the onboarding page for new users.
- /Support:** If you get stuck or have any questions, typing this will put you in touch with our friendly human support agent.
- /Price:** Want to get the latest market data and pricing? Type `/price` followed by the token of your choice (eg. `/price eth`) and you will get the current market price of Ethereum.
- /News:** Wondering what the latest developments in the Crypto world are? This command will bring up the 5 latest crypto articles. Try `/news btc` or `/news alphapoint` for more specific news.

- /Send:** The easiest way to send crypto to anyone anywhere.
- /Receive:** This is how you get your Wallet addresses. However,, if someone is sending you crypto using chat, they just need to use your phone number.
- /Balance:** Display all the tokens currently held in your Wallet.
- /Wallet:** Greeting the bot with this command will bring up the main menu and command list.
- /Trade:** This command allows you to execute trades instantly based off the current order book. Real time market price will be displayed for at market orders, or you can set a limit price of your choosing.
