

Payment Card Solutions

A secure and user-friendly way for users to spend their crypto daily, anywhere major credit cards are accepted. Now your users can take crypto gains to the checkout with seamless realtime crypto spending.

Benefits

Spend your crypto anywhere

Allow consumers to spend their crypto in the real world anywhere major credit cards are accepted

Institutional grade architecture

Utilize our scaling software together with major credit card partners like Visa and Mastercard to build a brand people know and trust

Grow user base and expand revenue channels

Use crypto beyond just trading, generating interest in your exchange that allows spending in addition to core and advanced trading features

Lead the world in crypto utility

Offer competitive industry leading services as Coinbase and Binance, with additional features that even they don't include

Features

Debit card functionality

Ability to spend money from APEX balance anywhere Visa/Mastercard is accepted

No more "Insufficient balance"

Automatically convert from multiple currency balances when trying to spend money from a currency with insufficient balance

Control your crypto Spending

Set spending limits on what can be liquidated from your different cryptocurrency holdings to control your personal budget

Micropayment capable

Send/receive BTC with Lightning network, positioning you at the forefront of crypto payments
